DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8 January 2007 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-15, 18-31, and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Harris (US 5,295,976).

Harris discloses a casing with front (24) and rear sections (60) and a reservoir (26), a driven device (46), a dosing means (64) with a dosage scale (66), a drive device (50 and 60) with a delivery stopper (64) with an indicator marking (window 62 which can also include a lens).

The dosing means (64) has an inner body (projection between 58 and 60) and an outer body (projection at label 64 in Fig 2 between the 60 and 40), with a gap between (shown where 40 projects inwardly of 64 at the distal end of the syringe)

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 16,17, 32 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harris in view of Castellano (US 5,728,074).

In reference to claims 16 and 32, the limitations are shown above except for a cannula less than a 30 gauge. Castellano discusses the use of a 27-gauge needle. See col. 7, lines 52-54. It would have been obvious to one of ordinary skill in the art to modify the invention of Harris by including a 27-gauge needle, as suggested by Castellano, to achieve optimum results

In reference to claims 17 and 33, Harris and Castellano disclose the claimed limitation as shown above. Harris and Castellano, however, do not disclose expressly using a 31 or 32- gauge cannula. At the time the invention was made, it would have been an

Art Unit: 3767

obvious matter of design choice to a person of ordinary skill in the art to use a 31 or 32-gauge cannula instead of a 27-gauge cannula because Applicant has not disclosed that a 31 or 32-gauge cannula provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with 27-gauge cannula because both provide a means to deliver medication. The choice of the cannula gauge is dependent on the location of the injection. Therefore, it would have been an obvious matter of design choice to modify Harris and Castellano to obtain the invention as specified in claims 17 and 33.

Double Patenting

6. Claims 22,23,24,25 and 26 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 2,6,7,8 and 9 respectively. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Response to Arguments

7. Applicant's arguments with respect to claims 1,2,4,5, and 10-21 have been considered but are moot in view of the new ground(s) of rejection.
